

# GET SMART experience @ Bell Trace

BLOOMINGTON'S RECOGNIZED RESOURCE FOR SENIORS

**PLEASE RSVP—APRIL 27TH**

***NORM HOLY, PhD***

Talking about Climate Change has become a bit controversial these days. Norm Holy will take you on a trip through the history and the present day impact of our changing environment. From 50 million years ago to what we've experienced over the past 150 years, Norm will share climate change issues in a way that will help us understand the science behind it and the real life consequences. This interactive discussion will certainly spark a lot of conversation, so bring your questions.

Norman Holy received a PhD in Chemistry from Purdue University. He was a Research Fellow at Rohm and Haas in Philadelphia. He produced 100+ plus patents and journal articles. He authored the book, *Deserted Ocean*, a history of fishing in the North Atlantic. He retired from Bristol-Myers Squibb in 2007 and now volunteers as a reporter for WFHB, writing most of the scripts on climate change for the show, EcoReport. He's been investigating climate change issues since 1995.

**Thursday,  
April 27th**

**11:30 am—1:30pm**

**Complimentary  
Lunch  
& Discussion**
